

WARRANTY FOR FIRE RETARDANT SHADENETS

- Alnet (Pty) Ltd produces various industrial fire retardant shade cloth products from 100 % Virgin High Density Polyethylene raw materials (HDPE).
- Alnet (Pty) Ltd warrants that **Extrablock Fire Retardant** fabrics manufactured from HDPE, will not degrade or show serious evidence of material breakdown as a result of exposure to normal Ultra Violet light for a period of **10** years from the date of purchase. Alnet will not be held responsible to replace any portion of netting which shows no evidence of material degradation, caused by exposure to normal Ultra Violet light. The fire retardant additives are added during the process of extrusion and will thus retain their affectivity during the lifespan of the fabric.
- No warranty applies where the damage is as a result of mechanical abrasion, chemical erosion, damage caused by the erection process, mishandling or excessive loading beyond the tear and tensile strength of the products. The warranty does not extend beyond the resistance to UV degradation. Extrablock Fire Retardant shadenets have also been tested for fire retardancy and meet, but do not extend beyond, the fire retardant requirements of the California State Fire Marshall in the United States of America.
- Exposure of HDPE to certain strong oxidising agents, such as fuming sulphuric acid, concentrated nitric acid, nitration acid, chrom-sulphuric acid, chlorosulfonic acid, coal tar products, creosote and halogens, can lead to the degradation of the products, and where the products are to be used in areas exposed to chemical contamination, or any of the above, reference should be made to the Alnet technical department before erection of the products. Alnet accepts no liability to any party or property for any use of any Alnet product in a manner for which the product is not intended. Where creosote poles are used as supports then these poles must be covered or capped to prevent direct contact with the fabric.
 - Slight colour variances may occur.
- This warranty applies only to the original purchaser of the product and no claims for reimbursement of installation expenses or any consequential claims, indirect or direct, will be entertained. Alnet accepts no liabilities for damage or injuries caused through failure of the product, or failure of steel or wooden or any other structures, to any party or property. The user should inspect the product for mechanical flaws before using or conversion.
- Except for the warranties set forth above, Alnet expressly disclaims and excludes all other guarantees, warranties, conditions and representations, either express or implied, whether arising under statute, law, commercial usage or otherwise, including implied warranties of merchantability and fitness for a particular purpose. Alnet's total responsibility shall not exceed the value of the Alnet goods in question.
- Claims for replacement of the product only, will be considered if the following is adhered to by the claimant:
 -
 - Documentary proof of purchase date, original purchaser and price, is provided to Alnet.
 - Samples of the "damaged" product are provided to Alnet including the colour coding on the edge of the fabric.

- Access is given to Alnet staff to inspect the “damaged” product on site.
- The claimant inspected the product for possible flaws before erection of the product.
- A certificate is provided to Alnet by a Registered Professional Structural Engineer, which certifies the accuracy of the design and stability of the supporting structure, over which the shadenet has been placed.

This warranty must be read in conjunction with the Alnet General Conditions of Sale, listed on the back of all Alnet invoices. By accepting Alnet quotations and/or placing a contract for goods with Alnet, it is deemed that the claimant has read and understood clearly Alnet’s Terms and Conditions of Sale/Contract, and that the claimant has agreed to the Terms and Conditions of Sale/Contract.
